

### **MEDICAL THERAPY**

- + Drugs or combination of drugs are used in an attempt to reduce swelling, thin mucus and restore drainage
- + Nasal irrigation, antibiotics, decongestants, mycolytics, nasal and/or systemic steroids
- + Provides temporary relief with possible drug side effects

### **BALLOON SINUS DILATION**

- + Comfortable, in-office procedure
- + Less invasive
- + Small balloon gently reshapes anatomy to expand drainage pathways
- + **Get back to your life the next day<sup>1</sup>**

### **ENDOSCOPIC SINUS SURGERY**

- + Performed in an operating room
- + Small cutting instruments are used to remove tissue and expand drainage pathways
- + Typically requires general anesthesia
- + **Get back to your life in 4-5 days<sup>1</sup>**
